

Quality Improvement Plan (QIP)

Narrative for Health Care Organizations in Ontario

March 17, 2026

OVERVIEW

Extendicare Tecumseh is a long-term care home located in Windsor Essex County and is part of a leading seniors' health care organization that provides high-quality care and services for seniors across Canada.

Providing the highest quality of care, we provide for our residents, and their families guides all we do. We are committed to continuous improvement, and on an ongoing basis, we seek new ways to evolve our training, technology and practices to best support the residents we serve and their families.

Our Purpose, Mission, Vision and Values

Our Purpose is helping people live better.

Our Mission is to provide people with the care they need wherever they call home.

Our Vision is ensuring everyone in Canada has access to the care and support they need to live their best lives.

Our Values

- We embrace every person for the individual they are.
- We care for each person as we would our own family.
- We collaborate with others because we achieve more together.
- We are relentless in our efforts to improve.
- We respect the resources entrusted to us.

Quality Framework

Extendicare's Quality Framework outlines the ways in which our home is supported to achieve success with a focus on quality of life, safety, regulatory compliance and resident engagement. In alignment with provincial requirements, each Extendicare home in

the province is responsible for directing their quality plan, with the support of a dedicated regional team of subject matter experts who assist us with our home's quality initiatives. Our strategic direction and the initiatives that support the plan also meet or exceed standards set by Accreditation Canada and meet the requirements of our Long-Term Care Home Service Accountability Agreement (LSAA) with the Ministry of Long-term Care.

Our home's multidisciplinary Continuous Quality Improvement (CQI) Committee oversees our quality program. It is led by our home's CQI lead. Membership includes our home leadership team, each designated program lead, Medical Director, Dietitian, Pharmacy Consultant, Resident and Family Council representatives, and care team representatives, including a Personal Support Worker and a Registered Nurse. Our CQI committee meets quarterly at minimum, and uses a CQI Framework in alignment with Extendicare's enterprise-wide strategic care quality priorities, to identify key areas for quality improvement in our home, make recommendations, monitor and measure progress, identify and implement adjustments, and communicate improvement outcomes for the current and following year. Results are discussed and shared with residents, families, team members and external partners to support our priorities, targets and activities.

Across our organization, Extendicare measures and monitors our quality initiatives and quality indicator results. Home-level quality reports are circulated monthly and reviewed by homes and regional teams across our network, to help us monitor progress and drive meaningful conversation about ways we can improve, at each home's CQI committee meetings. Performance monitoring is a key part of our relentless effort to improve performance. Our quality

assurance work includes but is not limited to:

- Monitoring key quality indicators
- Internal audits
- External audits
- Annual program evaluations
- Resident and Family Experience Survey results

In 2025, our home's Quality Improvement Plan priority areas included Fall Prevention, Restraint Reduction, Antipsychotic Deprescribing, and Pressure Injury Reduction. Guided by valuable feedback from our home community, the following top areas for improvement identified from our 2024 Resident and Family Experience survey results were also included:

Resident Experience survey: If I need help right away, I can get it, I enjoy eating meals in the dining room and Communication from home leadership (Administration, Executive Director and Managers) is clear and timely.

Family Experience Survey: I am satisfied with the variety of food and beverage options for residents; I am satisfied with the food and beverages served to residents and I am satisfied with the quality of care from doctors.

We are proud of the following achievements and improvements that were implemented based on the 2024 survey results and that were part of our 2025 quality plan:

Resident Experience: In my care conference, we discussed what's going well, what could be better, and how to improve things

showed an increase from 73.2% to 90.3%

Family Experience: I am satisfied with the quality of the food and drinks serviced to residents increased from 76.3% to 78.9% and I am satisfied with the variety of food and drink options for residents this area increased from 73.7% to 79.7%

Our CQI committee has determined that for 2026, our priority areas for quality improvement in our home will continue to focus on quality and safety indicators, including Fall and Injury Prevention, Worsened Pressure Injury Reduction, Antipsychotic Deprescribing and Restraint Reduction. In addition, we will include the following areas from our 2025 Resident and Family Experience survey as determined through consultation with our Resident and Family Councils:

Resident Experience survey:

- I would recommend this home to others
- I am satisfied with the food and drinks served to me.
- I enjoy eating meals in the dining room

The home will develop and implement a home specific survey to identify dining room experience

Family Experience survey:

- I would recommend this home to others.
- The residents appears to enjoy eating meals in the dining room.

The team will add dining room experience as a topic of discussion on the care conference agenda by April 1, 2026

ACCESS AND FLOW

Ensuring good access to care and supporting flow means that the right care is received in the right place at the right time across the health care system. We have an important role to play, and Extendicare is committed to working closely with our community partners including our regional Ontario Health at Home team, hospitals, community and business partners to ensure safe, effective and high-quality care of residents across the organization and at the local home level. We do this through ongoing relationship building and active partnerships with health system partners such as local long-term care homes, regional Infection Prevention and Control (IPAC) hubs, Ontario Health teams and various regulatory authorities.

In addition, our partnerships extend to our Medical Advisor and Attending Physicians as we work to improve medication management, clinical care and reduce unnecessary emergency department (ED) visits.

We work together with residents, their families and our health system partners to ensure safe, person-centered and effective admissions to our home, including through a collaborative process to develop individualized care plans to meet each resident's unique needs. We understand transitions throughout the system are not easy for those we serve.

We work to apply additional care and attention to closely engage and support those in our care at times of change or at times where specialized supports are required in their health care journey.

Prevention and health promotion

Throughout the year, we support and participate in organization-

wide awareness campaigns that educate team members, residents and families. Our home has access to an annual awareness calendar that highlights key health promotion and professional recognition events, which are supported nationally through communication and education, and locally at our home with activities that are tailored to the home's needs and demographics. Organization-wide educational campaigns include:

- Safe Spaces: Four key safety awareness events – Infection Control Week, Canadian Patient Safety Week, Seniors' Safety Week, and Fall Prevention Month – are combined into an annual, six-week sustained safety campaign each autumn. Aimed at promoting a culture of safety across the organization through education, resources and home-level activities, the campaign equips our team members with knowledge and tools to continuously improve quality and safety and engages residents and families as partners in care.
- Stick it to the flu: Through Extendicare's annual influenza vaccination campaign, all homes are encouraged to aim for 90% vaccination rates for of residents and staff. Individual and home-wide incentives are provided for achieving this benchmark, and our home hosts on-site vaccination clinics.
- Hand Hygiene Day: Led by our IPAC team, each year, this day is marked by an intensive focus on tools and education to promote proper hand hygiene practices for team members, residents and families. Homes across Extendicare participate in a friendly challenge to find the most creative and engaging ways to promote hand hygiene – from writing jingles to hosting events.
- Alzheimer's awareness: In long-term care, we are entrusted to

care for a resident population that is impacted by rising rates of Alzheimer's and dementia. In addition to an intensive communication focus during Alzheimer's Awareness Month every January, our home has access to tools and education year-round that helps our team members tailor personalized care to the unique needs of each resident living with dementia – respecting their own lived experiences, preferences and behaviours, from Gentle Persuasive Approaches (GPA) training, to dementia-focused tools for skin and wound care.

Right care in the right place at the right time

On an ongoing basis, we work hard to support, train, retain and recruit qualified and compassionate team members who work together in service of quality care for residents. We know strong interdisciplinary teams are essential to the delivery of quality care and we foster a culture of collaboration to contribute coordinated expertise, as resident plans of care are provided. In addition, we are actively recruiting Nurse Practitioners to support our collaborative models of care, continue to invest in building credentials among our team for advanced wound care nurses (SWANs), provide training and resources for our team to enhance skillsets in IV therapy with multi-venous IV training arms, compassionate end-of-life care and more.

Building capacity

We recognize how important long-term care is within our health system. At an enterprise-wide level, Extendicare is actively working to increase access to care through the construction of new long-term care homes built to modern design standards with the goal of

increasing access to care for more people on the province's long-term care waiting list. In communities across the province, Extendicare is building for the future, with plans to redevelop every older home in our network. New homes are designed to deliver significant improvements to resident quality of life, with private bedrooms for all, enhanced communal lounges for activities and family visits, increases in space for restorative therapies and more.

EQUITY AND INDIGENOUS HEALTH

Extendicare is committed to improving equitable access, experience and outcomes to reduce health inequities and advance indigenous health across our organization.

At Extendicare, we embrace every resident for the individual they are, and care for them as we would our own family. Our Equity and Indigenous Health program reflects our core values by recognizing and honouring the diverse identities, cultures, and experiences of each resident. By integrating culturally appropriate care and Indigenous traditions, we affirm the importance of personal and cultural heritage in shaping well-being. Through culturally diverse programming, menu selection, staff education and meaningful community partnerships, we create a safe and inclusive environment where residents feel valued, respected and empowered to be their authentic selves. This commitment is essential to providing compassionate and equitable care.

Our Equity and Indigenous Health program is informed by our Resident and Family Councils, and by the data we gather from our annual Resident and Family Experience Survey. Through partnerships with local Indigenous Elders, Knowledge Keepers, and regional health organizations we are able to integrate healing

practices and culturally significant activities into care plans. Personalized support ensures residents feel seen, respected and connected to their heritage.

Implementing specific training on cultural safety, anti-racism, and the history of Indigenous Peoples in Canada for all staff, fosters awareness and equips caregivers with the skills to address systemic barriers and biases. Identifying and addressing systemic gaps in care, including access to interpreters, culturally appropriate meals and resources, and the provision of trauma-informed care, are skills taught in staff training. Regularly assessing program outcomes through resident feedback, and staff input, helps us ensure continuous improvement.

Some examples of programs we have implemented include implementing mandatory training on cultural safety, anti-racism, and history of indigenous people Canada for all staff, fosters awareness and equips care givers and skills to address systemic barriers and basis. Identifying and addressing systemic gaps in care, including access to interpreters, culturally appropriate meals and resources, and the provision of trauma informed care, are taught in staff training. Regularly assessing program outcomes through resident feedback and staff input helps us ensure continuous improvement. In 2026, we commit to continued efforts in support and recognition of the many diverse histories, perspectives, identities and traditions among our teams, residents and their families in our home community. In alignment with the Extendicare Awareness Calendar, we are committed to fostering an inclusive environment by recognizing, educating, and celebrating significant cultural, religious, and ethnic observances, including Lunar New Year, Black History Month, Truth and Reconciliation, Ramadan,

Lent, Hannukah and Pride Month.

PATIENT/CLIENT/RESIDENT EXPERIENCE

Active engagement of residents and families is essential to our values and is a foundational pillar of quality care. Annually, through an anonymous survey, we seek feedback from residents and their families about what they feel is going well and what we can do to improve. The annual survey provides our home with a summary of the scores and comments for each of the areas of care and services offered. We use this report to collaborate with the residents and family councils to determine an action plan to improve the experiences of the people we serve. On a regular basis during the year, we discuss progress updates and strategies for improvement via town halls, resident and family council meetings and newsletters.

Our ongoing goal is to incorporate feedback to continually improve the quality of care we provide – and the programs and services we deliver - by ensuring the care each resident receives is reflective of their individual needs and wishes.

Extendicare is proud to have a National REACH (Resident Experience Action Council for Homes) comprised of resident and family representatives from our long-term care homes in every province where we operate. The council is co-led by resident and family members and provides valuable input on organizational initiatives and decisions. Supported by designated head office leaders, a community of practice meeting is held bimonthly and is open to all residents and families interested in sharing best practices and learning new ways to approach engagement, co-design, and council roles and responsibilities.

Our 2025 Resident and Family Experience Survey Results:

Dates of our 2025 Annual Resident and Family Experience Survey:
September 2 – October 10, 2025

Resident: Would you recommend this home? 78.4%

Family: Would you recommend this home? 88.7%

Survey results were reviewed by CQI committee: December 11, 2025

Survey results were shared and discussed with Resident Council:
January 20, 2026

Survey results were shared and discussed with Family Council:
February 3, 2026

A copy of the survey results was provided to Resident Council:
January 20, 2026

A copy of the survey results was provided to Family Council:
February 3, 2026

Survey results were posted on our bulletin board: January 20, 2026

Survey results shared with staff in the home: January 28, 2026

During discussions with the Residents and Family council when sharing our 2025 results, three areas were determined to be most important priorities for us to focus on and these are included in our 2026 QIP.

Top three areas Resident Experience survey priorities for improvement in 2026:

1. I would recommend this home to others, is 78.4%

Each department will create an action plan for missed targets on experience survey by March 30, 2026. Leadership meetings will be held monthly to review progress on action items.

2. I enjoy eating meals in the dining room, is 57.1%

Our plan for 2026 will be to review the policy for pleasurable dining with the leadership team and resident council. Complete staff education and initiate pleasurable dining to each home area. Implement a resident specific dining room experience survey by April 1, 2026

3. I am satisfied with the food and drinks served to me. 50.0%.

The home will complete full implementation and sustainability of Meal Suite to all dining room areas within the home by August 31, 2026

PROVIDER EXPERIENCE

Extendicare Tecumseh is part of a broader organization in which there are many opportunities to engage with staff and leaders in sharing quality improvement goals and commitments. This is achieved through Employee Engagement surveys, sharing of best practices organization-wide, regional quality labs, and participation in the Ontario Long Term Care Association (OLTCA) Quality Committee and annual quality forums.

Our annual Employee Engagement survey provides an opportunity for team members to give their feedback on various issues such as staff satisfaction, innovation, and work environment. Based on previous Employee Engagement results we worked hard this year to engage our team members to help them understand how their work connects to our strategic priorities and how that drives our mission.

Employee engagement continues to rise, with scores up by 0.3 and

over 15,000 surveys completed. We'll keep building on this momentum and clearly communicate how every team member's contributions motivate our organizational goals.

Extendicare has an organization-wide Care Champion Program which celebrates the meaningful work, commitment and passion demonstrated by our dedicated team members. This program places a spotlight on team members who go above and beyond to improve care, every day for our residents. Active team members at our long-term care homes can be nominated by our residents, family members, peers or managers, for special recognition of the extraordinary care they provide.

The home has actively utilized sponsored advertisements on Indeed across all departments to strengthen recruitment efforts and increase candidate reach. Newly hired team members have been supported through comprehensive onboarding and integration processes to promote a successful transition into their roles and to enhance early retention.

Looking ahead, the home is taking proactive steps to build a sustainable workforce pipeline by participating in 2026 job fairs at the University of Windsor. By engaging directly with students in Nursing, PSW, and Recreation programs, the home aims to promote long-term care as a meaningful and rewarding career path while establishing early connections with future graduates.

The home also supports employees in advancing their careers through educational upgrading opportunities. Extendicare offers scholarship programs supporting RPN and RN advancement, reinforcing a culture of professional growth and internal career

progression

SAFETY

At Extendicare, we take a system approach to preventing and reducing resident safety incidents. At the core of this approach is system learning and process improvement.

Incidents and risks are escalated rapidly within the organization, so that they can be addressed and mitigated as effectively as possible, with rapid response support provided to home care teams by specialized organizational support team members. When a root cause from an incident in one home is identified that may pose a risk elsewhere, an alert is sent out to all care teams across our organization. These alerts flag issues and risks home leaders should be aware of, and preventative measures homes need to take in relation to care practice and risk prevention.

Safety data is analyzed continually from all Extendicare homes to identify improvement opportunities. Standardized process, policy, practice and technology improvements are developed in response, and shared through education with care teams across all our homes. Education and question and answer (Q&A) webinars are held on safety and clinical practice topics derived from this analysis and attended by leaders and clinicians from all Extendicare homes throughout the year.

From front-line to senior leadership, safety incident reporting, awareness and response, is embedded in our roles and daily work. All these program elements, and more, comprise our safety culture program.

PALLIATIVE CARE

Residents and families in long-term care deserve compassionate, high-quality care. Our teams collaborate with residents and families to tailor plans of care based on each residents' individualized needs.

We provide enhanced palliative care training for interdisciplinary teams, in partnership with Pallium Canada, enabling high-quality clinical, spiritual and emotional palliative care supports for residents and their families. In 2026 as an organization, we are training additional facilitators so we can provide ongoing educational opportunities as we continue to build a culture utilizing a palliative approach to care.

In collaboration with Pallium all Extendicare homes have a registration link to family caregiver education on palliative care. The CARERS course is available free of charge and is an excellent educational opportunity we promote for caregiver support.

In 2025, we updated our Palliative Program policies and procedures to further emphasize the importance of a palliative care philosophy. Our 2026 focus will continue to build upon earlier awareness and identification of those who require a palliative approach to care through implementation of a standardized Palliative Assessment which is designed to guide staff in addressing the holistic needs and symptom management of each resident.

POPULATION HEALTH MANAGEMENT

Extendicare Tecumseh considers the unique demographics in our home when planning care delivery requirements, programs, resources and external partnerships.

In our home our population needs consist of geriatric population. To meet the individualized needs of our residents, we have implemented programs such as; restorative care, spasticity clinic, mental health/geriatric mental health outreach program, bariatric care, palliative care program. Our team is equipped to meet and maintain resident's mobility and independence by engaging them in recreational programs, attending to physiotherapy needs, providing access to physicians and health practitioners.

Our team also provides specialized treatments such as tracheostomy care, gastrostomy care, foley and suprapubic catheter care, and complex wound care. We also collaborate with Go Smile, Prevail, Westminster Mobile (WMMI), Dynacare, Medical Pharmacies, Motions Specialty, Canadian Mental Health Association, Acquired Brain Injury Association, Alzheimer society and Geriatric Mental Health Outreach Team.
